

ELIXIR INDUSTRIES

SINCE 1948

Elixir Crawspace Door

Elixir Industries has identified several flaws with the typical crawspace access door that is on the market today. In order to solve these problems, we have developed our own design. With high quality and cost efficiency in mind, we are now offering the Elixir Crawspace Door to our customers.

One of the major problems we identified with current crawspace doors is that they have a propensity to rust. Rusting not only creates an eyesore, it also prevents latches and hinges from functioning correctly. We designed our crawspace door to alleviate this issue by constructing the door frame and core surround out of aluminum. The core of the door is removable from the frame to aid in unobstructed access to the crawspace while working under the structure. The latching system is simple, yet effective, and allows for the door to be optionally locked with a padlock for security and safety.

Specifications & Features:

- Constructed with *rust resistant* components
- Removable door core for easy access
- Energy efficient insulation
- Safe and secure latching system
- Sizing available for three standard openings
 - 24" x 24" (Part# 24-552-0000)
 - 32" x 24" (Part# 24-552-0001)
 - 32" x 32" (Part# 24-552-0002)
- Aesthetically appealing
- Can be mounted flush or recessed in the opening
- East to install (during construction or as a replacement door)

A quality home demands a quality crawspace door!
