Elixir Series 8000 Vinyl Steel Housetype Combination Door

Elixir Series 8000 Vinyl Steel Housetype Combination Doors are constructed from vinyl laminated galvanized steel which is over sixty percent thicker than the painted galvanized steel offered with the Series 6000. The door comes with weatherstripping on both the jamb and the door creating a double seal that protects against air, light, and water penetration. Other features include highly efficient polyurethane foam insulation with high R-Values, a 3-fin vinyl sweep, an adjustable door stop, a swivel lock, and a sloped threshold. The storm door, with a built-in drip cap, comes in three options: conventional, all glass full-view, and full-view. The storm door is 1-1/8" thick with 1/8" tempered safety glass. The storm door is available in three different colors: mill, white, and bronze. Three additional hardware items also come with the Series 8000: a swivel lock bolt, a closure kit and/or safety chain. Other additional hardware items such as a deadbolt and a knocker viewer are also available upon request. Series 8000 doors are available in an assortment of sizes and window options.

Quality Wood Jambs

Finger Jointed or LVL Pine
With Adjustable Stop
